

Director, Project Services Facilities and Campus Development British Columbia Institute of Technology (BCIT)

Location: Burnaby, BC

In 2014, British Columbia Institute of Technology (BCIT) celebrated five decades of providing highly relevant, critical training and education to individuals endeavoring to be uniquely career-ready in a competitive and ever-changing market. As the largest polytechnic in Canada, with over 47,000 students enrolled annually, BCIT is one of British Columbia's largest post-secondary Institutes. Renowned for offering hands-on, practical learning, a BCIT education has continued to challenge students through programs that provide real-life, contextual instruction, and has increasingly integrated applied research into both educational practice and industry advancements.

Due to a retirement, and at an exciting point of capital expansion at BCIT, a new unit leader is being sought to assume the role of Director, Project Services. Reporting to the Senior Director, Facilities and Campus Development, this new Director has responsibility for all capital project delivery (both renovation and construction projects) across BCIT's main and ancillary campuses. With a major capital campaign recently announced, and increased funding in place for a number of significant renovation projects, the new Director will lead an experienced team of 12, including five Project Managers and, additionally, multiple consultant groups.

The ideal candidate has a proven track record of success managing large scale projects, ideally from within the public sector. Alternatively, he/she brings experience as a talented project manager of complex building initiatives from a construction, property development, engineering or architectural firm where public-sector clients have been a significant part of their work. A strategic and effective team leader, he/she will build capacity in the unit through active mentorship and the introduction of best practices and operational efficiencies. He/she will partner effectively on and off campus, maintain a wide range of productive relationships and infuse a disciplined approach to all aspects of project management during what will be a highly productive phase of capital project execution at BCIT.

This is an outstanding opportunity for an individual to have a lasting impact on generations of students to come by playing a leadership role in crafting a world-class facility for a truly progressive and unique organization.
