Forward-Thinking | Client-Focused | Empowerment | Responsibility

BC Housing is the provincial Crown agency that develops, manages and administers a wide range of subsidized housing options for those most in need across the province.

We are a trusted leader and partner in providing housing solutions for British Columbians. Through safe, affordable and quality housing, we truly make a positive difference in people's lives and communities.

What makes BC Housing such an inspiring place to work? Our passion for making a difference, our people strategy, our values and so much more!

We're seeking candidates who share the values of our organization and who are committed to helping those in need. **Make a positive difference with us; an exciting opportunity awaits!**

Systems Analyst (Business Analysis Manager)

Short-term/Full-time - Approximately 1 year

Job ID: 2567

Burnaby, BC

Play a key role in business analysis and support for core business systems in a dynamic, evolving IT environment

Reporting to a Manager, IT Programs, you will provide business analysis and perform testing for BC Housing's systems to ensure proper operation and meet appropriate quality standards in order to accomplish business objectives.

Management will rely on your assistance in supporting testing activities as well as writing and executing test cases, validating and clarifying business and technical requirements throughout the process. Related functions include system support activities, working on identified issues by troubleshooting and helping to identify root cause, coordinating fixes and change requests, and participating in defect tracking and triage meetings.

Your credentials include a recognized degree in Commerce/Business Administration or Information Technology, coupled with 3+ years' business analysis experience, 5+ years' IT industry experience specifically focused on IT solutions and services and/or appropriate training/experience. Considerable experience in supporting enterprise-wide business systems is required, as is a broad knowledge of business processes.

Naturally, attention to detail is a key skill necessary in performing testing activities. You have a technical background to be able to research and meticulously breakdown issues in identifying the root cause of issues as well as define and perform functional, non-functional, performance, black-box and white box testing.

Good communication and facilitation skills are important.

Core Competencies

- Personal Effectiveness ▪ Communication ▪ Results Oriented ▪ Teamwork ▪ Service Oriented

Leadership Competencies

- Alignment & Results ▪ Relationship Management/Building ▪ Team Development
